Nexus AI — Customer Success Standard Operating Procedures

Document Title: Global Retention, Downgrade & Save Authority Guidelines

Version: 2.4 (Enterprise Production)

Scope: Applies to all Customer Success Managers, Account Executives, and Support Leads.

Section 1: Churn Risk Tiers & Mandatory SLAs

• **Low Risk (< 30% Churn Probability):** Accounts in this tier require standard proactive nurture. Quarterly product webinars and automated satisfaction surveys are scheduled automatically. No discount authorization is permitted without expansion.

• **Medium Risk (30% to 50% Churn Probability):** The Customer Success Manager must initiate an account audit within 5 business days. Review recent usage drop-offs and offer a complimentary 30-minute workflow optimization call.

• **High Risk (> 50% Churn Probability):** Triggers an urgent 48-hour response protocol. A senior CSM must conduct an immediate stakeholder review, verify billing contact validity, and schedule executive outreach.

Section 2: Pricing Authority & Maximum Allowed Discounts

• **Month-to-Month Save Strategy:** To stabilize accounts on flexible monthly contracts, CSMs are pre-authorized to offer up to a 10% discount for 3 months, provided the customer transitions to an agreed 6-month contract commitment.

• **High-Value Accounts (MRR > $100 or Tenure > 12 Months):** Authorized for up to a 15% discount for 6 months or 1 month free credit in exchange for an annual (12-month) commitment.

• **Enterprise Exception Tier:** Up to 20% discount on annual commitments. Requires written approval from the VP of Customer Success.

• **Strict Prohibitions:** Under no circumstances may any representative authorize discounts exceeding 20%, provide indefinite free credits, or waive unpaid historical balances without finance approval.

Section 3: Contract Restructuring & Flexibility Rules

• **Seasonal & Financial Hardship Pauses:** Accounts in good standing may pause their active subscription billing for up to 60 calendar days without losing customer configuration, analytics, or historical records.

• **Downsizing & Tier Downgrades:** When a customer requests cancellation citing team contraction or budget reductions, reps must offer a downgrade to the next lower tier (e.g., Enterprise to Pro) with contract restatement, explicitly waiving early termination fees.

• **Billing Frequency Conversion:** Transitioning from monthly to annual prepaid billing provides 2 months free (equivalent to 16.6% annual savings) without requiring VP approval.

Section 4: Technical Friction & Support Escalation Remedies

• **Unresolved Support Tickets & SLA Breaches:** If a customer has unresolved high-priority tickets open for more than 7 days, assign a dedicated Solutions Architect for a direct technical review call and issue a 1-month 50% service credit.

• **Consecutive Payment Failures:** For accounts with 2 or more consecutive payment failures, verify credit card expiration and offer automated ACH or invoice terms with Net-30 payment buffers before service suspension.

• **Platform Latency & Outage Complaints:** Offer priority support routing and assign direct phone-support escalation for the following 90 days.

Section 5: Feature Adoption & Engagement Drop Interventions

• **Usage Drop (> 25% Decline in 30 Days):** Schedule a 1-on-1 feature re-alignment session to identify bottlenecks. Provide customized Loom tutorials for underutilized modules.

• **Executive Champion Departure:** If the primary sponsor leaves the customer's organization, initiate a new stakeholder discovery session within 7 calendar days to train the incoming team lead.
